(a) Extra cost to make each output valid
MST (full model)
Ablation: without hard admissibility
Ablation: without infeasibility reporting
Ablation: without exact search (Dynamic Greedy-MST)
Goal obfuscation and legibility (Kulkarni et al. 2020)
Model reconciliation (Chakraborti et al. 2017)
Parsimonious HAExA (Mualla et al. 2022)
Ablation: without sufficiency threshold
Baseline: greedy submodular cover
Ablation: without disclosure-cost objective
Baseline: budgeted coverage
Role-aware HAExA (Kumar et al. 2026)
Baseline: full disclosure
